AI agents running live

PROFILE

I help businesses save time, increase sales, and scale through **custom AI automations, conversational chatbots, and voice agents**. As a **team lead**, I manage and mentor interns while building production-grade systems in n8n, GoHighLevel, Retell AI, and Vapi. I also develop clean, responsive frontends to complement the automation systems I deliver — giving clients a complete, end-to-end solution.

SERVICES

Workflow Automation

n8n, GoHighLevel, Make.com — custom flows that replace manual work.

AI Voice Agents

Inbound & outbound agents (Retell AI, Vapi) for cold calls & after-hours.

AI Chatbots

Bots for WhatsApp, Messenger, Instagram, and websites.

Web Development

Responsive frontends, landing pages, and funnel sites.

A2P 10DLC Setup

Brand + campaign registration so SMS actually delivers.

CRM & API Integration

Connecting GHL, CRMs, and tools into one system.

WORK EXPERIENCE

Team Lead — AI Automation & Voice Systems

Aug 2025 – Present

Voksica · Karachi, Pakistan · Promoted from Operations Team Member

- ▶ **Lead and mentor a team of interns**, assigning tasks, reviewing work, and upskilling them on n8n, GHL, and AI voice tools.
- ▶ **Manage client projects end-to-end** — scoping requirements, setting timelines, handling communication, and delivering on schedule.
- ▶ Designed and deployed 20+ automation systems using n8n, GoHighLevel, and Make.com across multiple industries.
- ▶ Built inbound and outbound AI voice agents (Retell AI, Vapi) for cold outreach, after-hours handling, and lead follow-up.
- ▶ Engineered proposal-generation flows that deliver personalized proposals in under 90 seconds (Google Slides + GPT + Gmail).
- ▶ Created smart lead-routing workflows in GHL with UTM-based segmentation and AI-personalized SMS follow-ups.
- ▶ Delivered frontend development work — landing pages, funnels, and client-facing dashboards — alongside automation systems.

Operations Team Member

Feb 2025 – Aug 2025

Voksica · Karachi, Pakistan

- ▶ Supervised the technical development of AI voice agents using NLP, TTS, STT, and API integrations.
- ▶ Ensured performance, accuracy, and reliability of live systems through continuous monitoring and optimization.
- ▶ Troubleshoot and refined live deployments to maintain high conversation quality and minimal downtime.
